

COLOUR OPTIONS

Did you know.... there are **5,527,125** shades of every solid colour?

Dependant upon lighting, the human eye can see approximately 10,000,000 colours at any one time!!

Interesting eh? But with such mind blowing amounts of colours, how do you narrow down your options?

We have used our experience and knowledge to put together our favourite colours for print and text that are used in our collections. So if you spot the colour/s you want, take a note of it's name and let us know!

These are here to inspire you, help and you narrow down your ideas and discover what colours work best with which. However we use the world-renowned Pantone system to help us to identify and match the exact colour you want. So feel free to send us a colour sample.

PRINT AND TEXT... Digital Colours

All our colours have been tried and tested to ensure they print perfectly and match our paper colours.

PRINT AND TEXT... Specialties

FOILING - Foiling can be used as a replacement to ink on any solid text or pattern. The end result is a metallic shimmered surface.

We use a combination of hot foiling and digital foiling dependant upon the paper and desired end result.

FOILING: +£1.00 - £2.80 per item (dependant on finished size)

SPOT WHITE LAYER - When printing any other colour than black on to non-white paper a spot white layer is required.

To achieve perfectly printed colours on your items, sometimes a layer of white ink must be printed on to the coloured paper before the coloured ink can be applied over this. You'll never see this white layer but it means that the colour of the paper will not effect the finished colours.

SPOT WHITE: +£0.30 - £2.30 per item (dependant on finished size)
